A CHALLENGE TO COFFEE COUNTY

Coffee County citizens cannot help feeling ubilant over the announcement that our count as been selected as the proving ground for the first experiment to be made in a "farm homestead" novement which will attract nationwide attention The fact that more than \$2,000,000 are inolved in this gigantic enterprise places it among he major projects of the administration and it will truly be a "new deal" for the one thousand

farm families who will have the great privilege

of entering into the proposition, and the opportunity

of again becoming "home owners." Coffee County deplores the fact that so much of its farm land has, through force of circumstances been taken over by the Federal Land Bank. W. are not unlike many others in Alabama and other states in this respect. Yet, we should be proud of the fact that our fair county has been selected as the first to have the opportunity of showing the others just what can be accomplished.

Governor Bibb Graves has honored us in mak ng the selection. It was through his suggestion and through his efforts that the plan received ap proval in Washington and has been accepted b the Alabama Rural Rehabilitation Corporation The Governor has pledged active cooperation of other agencies of the State in administering and apervising this worthwhile enterprise.

Coffee County citizens owe to the Governor and all other officials connected with the experiment their wholehearted and enthusiastic cooperation in making a success of the venture and regaining for the county its leadership.

And to those who may be fortunate enough to share in the experiment by being chosen as buyers of these improved and well equipped farm homes comes a challenge to show the very best that is in them and to demonstrate by hard work and perseverance that they honestly and truly want "home." Ample provision will be made to give each and every family a "new deal" and a start at becoming home and land owners. How this challenge will be answered rests entirely with those who enter this great, new experiment.

What it will mean to Alabama, to Coffee County and to the 1,000 families is a question that cannot be answered now. It could hardly be estimated. The eyes of the nation will be upon us. Let us not be found wanting in this great under-
